Alcune funzioni di Maestro 2.0/Mediadab/Mediadab 2.0 sono vincolate alla pressione prolungata dei tasti sul volante; sulle vetture di tipo CANBUS può non essere disponibile l'informazione relativa alla pressione prolungata. Pertanto, in questo caso, alcune funzioni non sono disponibili dai comandi al volante, tuttavia rimangono disponibili dal telecomando originale.

Modalità A - Tasti disponibili

Vol + / Vol - / Seek + / Seek -

Modalità B - Tasti disponibili

Vol + / Vol - / Seek + / Seek - / SRC-Mode (cambio fonte musicale)

Some Maestro 2.0/Mediadab/Mediadab 2.0 functions depend on the sustained pushing of steering wheel buttons; on CANBUS vehicles this sustained pressure information could be not available. In this case some functions will not be available through steering wheel commands but only by the original remote control.

Mode A - Available Buttons:

Vol + / Vol - / Seek + / Seek -

Mode B - Available Buttons:

Vol + / Vol - / Seek + / Seek - / SRC-Mode

*Solo con i seguenti equipaggiamenti: - Business Radio - Business Navigation. Con l'equipaggiamento Professional Navigation i tasti di Seek non sono disponibili.

*Only with equipments: - Business Radio - Business Navigation. With Professional Navigation equipment Seek button are not available.

**Solo con l'allestimento Professional Navigation, i tasti di Seek non sono disponibili.

**Only with Professional Navigation equipment, Seek buttons are not available.

VIDEO IN MOTION

| CODE | CENTRAL UNIT | UNIVERSAL HARNESS INCLUDED |
|---------------------|--------------|----------------------------|
| CF0010UNUN11 | ✓ | ✓ |

VIDEO IN MOTION è un dispositivo Canbus multiprotocollo che permette di attivare i monitor dei radio/navigatori originali quando viene inserita la retromarcia.

Tale peculiarità permette di abilitare il monitor quando viene inserita la retromarcia, in modo da poter abilitare la visualizzazione della retrocamera installata.

VIDEO IN MOTION è aggiornabile tramite computer. I file di aggiornamento sono disponibili sul sito www.paser.it.

Questo dispositivo aumenta notevolmente il grado di sicurezza durante le fasi di manovra del mezzo.

VIDEO IN MOTION dispone di numerosi protocolli Canbus contenuti in memoria.

L'unità è versatile poiché è aggiornabile anche per nuovi modelli ed adattabile alle applicazioni dei futuri modelli del mercato auto.

Paser declina ogni responsabilità nel caso questo modulo venga utilizzato dall'utente per la visione di DVD Player, TV Tuner, etc... durante la guida.

VIDEO IN MOTION is a Canbus multiprotocol device able to activate OEM Headunit monitors while the backgear is inserted.

This feature lets the user switch on the OEM monitor as soon as the backgear has been inserted, in order to activate the installed rear camera display.

VIDEO IN MOTION is upgradeable by computer. Updating files are available on www.paser.it website.

This device improves car safety during parking operations.

VIDEO IN MOTION has a wide range of Canbus protocols built in its memory.

The unit can be upgraded for new car models and it is also suitable for new employments of future car market.

Paser denies any responsibility in the case this module will be used to watch DVD players, TV tuner (or similar) while driving.
