

VeX™ Pipe Mounting Fixture Ruler

Instructions

1) Print and cut out the ruler.

IMPORTANT: This file must be printed actual size (100%). Printer output options such as “Fit to Page” and “Shrink Oversized Pages” will distort the ruler size and affect its accuracy.

- 2) Cut out the center section labeled, “CUT OUT THIS AREA”.
- 3) Tape the end of the ruler (where indicated) so that it is perpendicular to the pipe being measured.
- 4) Wrap the ruler snugly around the pipe and back onto itself. The red line at the taped end should be visible through the cut-out center window and should line up with the appropriate clamp SKU number for your installation.
- 5) Purchase measuring calipers to aid in future installations.

SKU	MODEL
91187	PS-SWMCP-B-1.000
91188	PS-SWMCP-B-1.250
91189	PS-SWMCP-B-1.500
91181	PS-SWMCP-B-1.625
91182	PS-SWMCP-B-1.750
91183	PS-SWMCP-B-1.875
91184	PS-SWMCP-B-2.000
91185	PS-SWMCP-B-2.375

If you still have questions concerning how to select the correct clamp for your installation, contact JL Audio Technical Support during regular business hours (1-888-JLAUDIO).
