MMR-40

NMEA 2000®
Network Controller

POSITION:

A full-function, MediaMaster® remote controller with color LCD display, specifically designed for marine applications.

IP66
DUST & WATER RESISTANT

Weatherproof Design:
IP66 rated and built to withstand the elements.

TECHNOLOGIES

MARINE TESTED DESIGN	**NMEA 2000®**

## SELLING POINTS:

#1 Engineered for real-world marine duty

• Weatherproof (IP66 rated) design and construction to withstand the elements

• Easy-to-read, high-brightness, 2.8-inch full-color LCD display with separate, day/night lighting and display themes

• Independent settings for display brightness and button backlighting
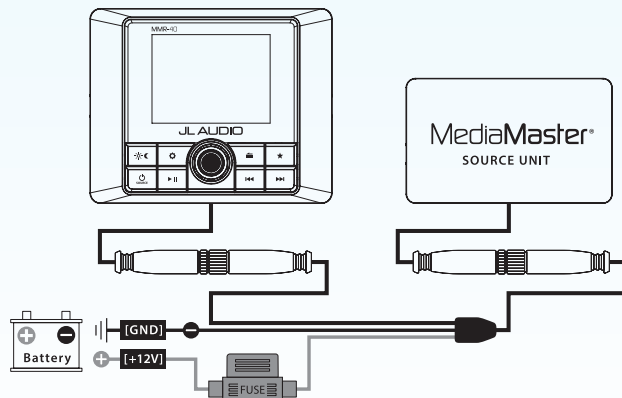

#2 True MediaMaster® experience

• Automatically recognizes which host MediaMaster® Source Unit it is connected to

• Delivers full-function control of MM100s & MM50 Source Units

• Compatible MM80-HR Hidden Receiver functionality permits control without requiring an MFD (Multi-Function Display)

#3 Two options for control via NMEA 2000® protocol

• NMEA 2000® Certified - MediaMaster® remote command functionality via:

- Your vessel's NMEA 2000® network using applicable network cables and connectors (sold separately)

To applicable network components (not shown)

To applicable network components (not shown)

- MMC-PN2K Powered Network Cables (sold separately) to create your own isolated, stand-alone network.
