

## SMC-8060/N COMPRESSION DRIVER

### **KEY FEATURES**

- Excellent power handling: 50 W<sub>AES</sub> above 1,5 kHz
- High sensitivity: 107 dB (1W / 1m)
- Extended frequency range: 0,8 18 kHz
- Low harmonic distortion
- 1,75" edgewound aluminum voice coil with polymide former
- Lightweight mylar diaphragm
- 80° x 60° horn
- Designed for compact cabinets

### TECHNICAL SPECIFICATIONS

| Throat diameter<br>Rated impedance | 25 mm                             | 1 in<br>8 O |
|------------------------------------|-----------------------------------|-------------|
| Minimum impedance                  | 5 Ω @ 4 kHz                       |             |
| D.C. resistance                    | 4,4 Ω                             |             |
| Power capacity*                    | 50 W <sub>AES</sub> above 1,5 kHz |             |
| Program power                      | 100 W above 1,5 kHz               |             |
| Sensitivity**                      | 107 dB 1                          | 1W @ 1m     |
| Frequency range                    | 0,8 - 18 kHz                      |             |
| Recommended crossover              | 1,5 kHz or higher                 |             |
|                                    | (12 d                             | B/oct min.) |
| Voice coil diameter                | 44,4 mm                           | 1,75 in     |
| Flux density                       |                                   | 1,65 T      |
| BI factor                          |                                   | 8,5 N/A     |

### MOUNTING INFORMATION

| Overall dimensions<br>Cutout dimensions | 140 x 140 mm<br>130 x 115 mm | 5,51 x 5,51 in<br>5,12 x 4,53 in |
|---|------------------------------|----------------------------------|
| Depth                                   | 121 mm                       | 4,76 in                          |
| Net weight                              | 1,5 kg                       | 3,3 lb                           |
| Shipping weight                         | 1,7 kg                       | 3,74 lb                          |

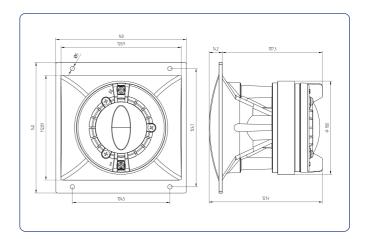

#### Notes:

\* The power capaticty is determined according to AES2-1984 (r2003) standard. Program power is defined as the transducer's ability to handle normal music program material.

 $^{\star\star}$  Sensitivity was measured at 1m distance, on axis, with 1W input, averaged in the range 1 - 7 kHz.
