

CA-HM-DAI.002

IVECO

DAILY 2014->

Compatible with double DIN devices

Take the left and right brackets and mount them on the supplied fascia plate with the supplied screws as shown in the picture.

Screw the left and right brackets on the aftermarket radio with the screws supplied.

Do all connections. Check the proper functioning of the whole system.
Mount the fascia plate on the dashboard.
This is the final result.

Double DIN Kit contents

Facia Plate
Mounting Brackets + screws

Installation Manual Double DIN Kit

This is how the original dashboard looks like.

Remove the drawer and unscrew the two screws as shown in the picture.

Remove the rubber compartment as shown in the picture.

Unscrew the central screw and remove the original fascia.

In order to fit the radio unit some plastic parts need to be cut and removed. The parts to be removed are the four "Wings" and the plastic rectangular central protrusion highlighted in the pictures.

Please note:
Cut the wings & center piece down so the unit will fit but still supports it.
If not done precisely the weight of the unit will rest on the fascia and cause damage after time.

In the picture is shown a proposal of how to perform the cutting operations.

All installation work must be performed by a qualified professional installer only. The manufacturer / dealer is not liable for any kind of incidental or indirect damages.
