Double DIN Kit content

Facia Plate
Mounting Brackets + Screws

All installation work must be performed by a qualified professional installer only.
The manufacturer / dealer is not liable for any kind of incidental or indirect damages.

Installation Manual Double DIN Kit

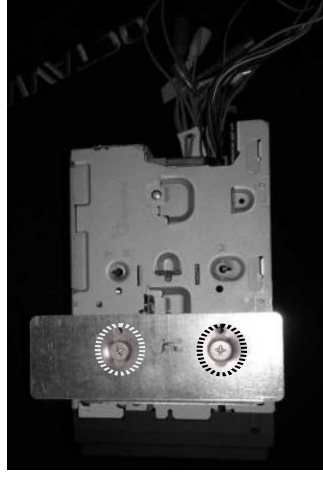

In the picture the original dashboard.

Carefully unclip the original panel, remove the OEM head unit with the proper 4 keys and save the white clips.

Take the left and right brackets and place them as shown in the picture.

Take the remaining two brackets and mount them on the AFT unit using the screws supplied, slightly forcing them to indent the head of the screw.

Connect all cables, insert the AFT unit into the housing and verify the proper functioning of the system. Finally fix all the brackets using the four small screws in the positions circled in the image.

Take the supplied fascia plate, place on it the clips saved before and mount it on the dashboard. The image shows the final result.
